Preventative Disinfecting Services

In the wake of recent events, we wanted to inform our network that we offer Preventative Disinfecting services. We use a Ultra Low Volume Spraying Application of a plant-based, hospital grade disinfectant. This solution is safe, EPA registered and kills up to 99.9% of bacteria in minutes. While we cannot guarantee the absolute prevention of spreading viruses, bacteria or germs, this process is designed as a preventative measure to help reduce the risk of spreading potentially harmful contaminants. We have been performing these services in commercial kitchens, distribution warehouses, offices, apartment building common spaces and prisons.

COVID-19 Response Bio-Remediation

We are providing, Bio Assured, a two step process. Both mPerial and mPale are EPA registered nontoxic, biodegradable and non leaching. mPale™ does not give off any gas during or after application. The chemistry of mPale™ polymerizes where it is applied and forms a covalent bond. The defensive nanolayer works to continuously protect surfaces. Normal cleaning will not remove the treatment, although over time it can be abraded away which is why we recommend 30 day reapplication.
